Webinar 3: Methods and Ways Forward for Assessing Cumulative Impacts

TUESDAY, JUNE 25, 2024

12:30PM-1:55PM (EDT)

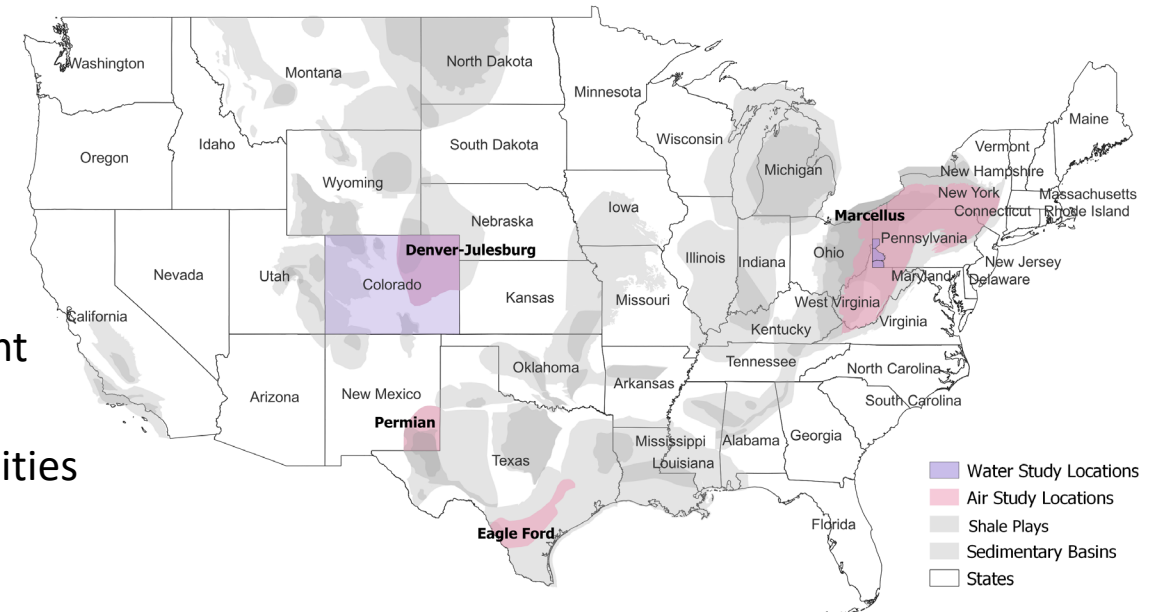

Logistics

- All attendees are muted with no audio for the duration of the webinar.
- You can turn on closed captioning for the event at the bottom of your screen to the *right* of the Q&A button.
- Submit questions via the Q&A function.
- This webinar will be recorded and posted on our website.
- If you experience any logistical difficulties, please send a message to the hosts through the Q&A.

Energy & Health Special Project: Design of a Cumulative Impact Assessment for an Oil and Gas Community in the United States

Objectives

1. *Synthesize* what is known about unconventional oil and gas development exposures and health and well-being.
2. *Support* decision-making about how best to ensure the protection of public health by identifying the most important health stressors.
3. *Learn* from our collective experience in oil and gas communities to protect future energy communities.
4. *Inform* policymakers, communities, researchers, and others implementing cumulative impact assessments on specific methodologies.
5. *Educate* on cumulative impacts research.

Special Panel Members

- Julia Haggerty, Montana State University (Chair), HEI Energy Research Committee
- Nicole Deziel, Yale University
- Stephanie Malin, Colorado State University
- Daniel Rossi-Keen, Riverwise

Thank you!

- HEI will make the webinar available on our website in the coming weeks: <https://HEIenergy.org/>
- Stay tuned for future announcements related to this project!
- In the meantime, stay up to date!
<https://www.heienergy.org/research/engage>
- We will send a follow-up email with the webinar recording and other materials including a quick feedback survey.
